RE: ISDN Services Ruling FCC No. 94-356 (rel.1/11/95)

Chairman Hundt:

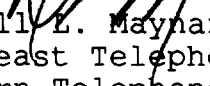

I am writing concerning regulations requiring multiple subscriber line charges (SLC) for ISDN (Integrated Services Digital Network) services. I urge the Commission to restore the single SLC charges for these services. We understand the FCC is reviewing these regulations and a decision is forthcoming.

ISDN capabilities are the catalysts for widespread voice and data communications on a grand scale. The need for ISDN increases daily. Analog networks are bottlenecks for multimedia access while ISDN makes it feasible for every desk in America to be a communications center. ISDN is the only standard capable of providing these services worldwide for the general public.

The National Information Infrastructure proposed by President Clinton depends on this capability as does a myriad of business, medical, environmental and entertainment applications.

ISDN must be kept affordable for every one. The FCC has the power to make this service the heartbeat of America's communications infrastructure by making the regulations provide ISDN at reasonable costs. We urge you to do so.

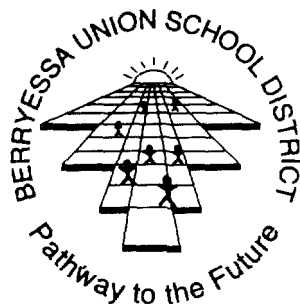

Sincerely,

Darrell E. Maynard, president

Reference: The FCC's Ruling in Connection with ISDN Services
FCC No. 94-356 (rel.1/11/95)

Dear Commissioner Barrett,

I am writing you in behalf of Berryessa Union School District in San Jose, California. I understand that the Commission is in the process of reviewing an order requiring multiple subscriber line charges (SLC) for ISDN (Integrated Services Digital Network) services. I urge the Commission to restore the single SLC for these services.

The introduction of ISDN has extended the possibility of a digital network to every teacher, student, administrator and clerical desk in our school district. We have been able to create our Wide Area Network with ISDN because of the lower costs of this service. Affordable access to the Information Age services for everyone in our district requires ISDN type services for telecommuting and distance learning. By increasing line charges, our district will be strapped to provide the access necessary for our students to become life-long learners in a global society.

As Director of MIS in Berryessa Union School District, I urge the Federal Communications Commission to restore the single SLC for ISDN services. We hope that the Commission will take all necessary steps that will allow affordable access to the wide range of the Information Age services for every student of the United States.

Sincerely,

Roxanne Harbor
Director MIS
Berryessa Union School District

Re: The FCC's Ruling in Connection with ISDN Services
FCC No. 94-356 (rel. 1/11/95)

Dear Chairman Hundt:

I understand that the Commission is in the process of reviewing an order requiring multiple subscriber line charges (SLC) for ISDN (Integrated Services Digital Network) services. I urge the Commission to restore the single SLC for these services.

There is an urgently growing need for ISDN type connectivity and services. The introduction of ISDN in the mid 1980's has extended the possibility of a digital network to every desk and every home.

Business can be conducted more efficiently and at lower cost in the areas of medicine, education, environment, telecommuting, entertainment, video conferencing, and many others. Such an improvement is absolutely essential for all Americans if we are to remain competitive within the global economy.

Sincerely,

Mike O'Gorman
